

WOOD-SKIN

«WOOD-SKIN gives dynamic volume and character to a multitude of materials, helping architects and designers bridge the gap between digital representation and architectural feasibility. The computational design department - a team of architects, designers, and engineers - can visualize the transformative power of the WOOD-SKIN surface and substantiate it into complex ad-hoc projects.

The combined offer of the two core products, Mesh Sheets and Fold Panels, is completely customizable and fits all design requirements. Finishing materials, dimensions, and geometric patterns can be declined in endless ways, thus ensuring each client with a Tailor-Made experience.»
