Description

Customizable wall and ceiling panels, offering design flexibility and acoustic features. Indoor architectural product with fast and safe assembly, sophisticated environmental and sustainable.

This product presents clever solutions to create your own spaces. Various combinations can be achieved with different color and material alternatives such as natural wood veneer (oak, walnut, teak), lacquer. Perforated surface options with 2 different diameters along with the material and the mass of the panel provide sound absorption. The geometry and the 3-D design of the surfaces provide sound scattering. The forms Mikodam offers are shaped with acoustic calculations and aesthetic requirements in mind. The use of this product on walls and ceilings will allow even distribution of sound preventing acoustical defects such as acoustical glare, echo or flutter echo. The isolators located between the rails and the walls stop vibrations from spreading and prevent undesired resonances.

Use Residential, Commercial, Retail, Display Design, Cultural and

Entertainment Spaces, Hotels, Bars, Restaurants, Theaters

Indoor use. Private and public spaces.

Applications Walls, Ceilings, Headboards, Separators, Acoustical Treatment

Characteristics Highly-customizable (through different material and perforation

combinations), decorative and acoustically functional, suitable for

reuse, easy application

Dimensions Width: 60 cm (23,62 "") | Height: 120 cm (47,24 ")

Depth: 10,7 cm (42,12")

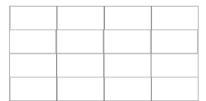

Rail depth is not included in the measurements. (Depth of rail: 1" - 2,5 cm)

Certification Quality and Reliability Management ISO 9001, Environmental

Management System ISO 14001, Occupational Health and

Safety 18001 certified
